

FOLK-S_I'LL BE YOUR MIRROR VERSION

Media Façade with Alessandro Sciarroni and Karim Zeriahen

A circle of dancers, and the repeated sounds of hands striking legs and shoes: a few, precise movements in a dance that lasts as long as the dancers hold out. FOLK-S is the contemporary performance by Alessandro Sciarroni inspired by the Schuhplattler, the typical folk dance of Bavaria and Tyrol.

The work, defined by the artist as "a performative and choreographic practice on the passing of time" views dance as a set of rules, a strict regime and ancient philosophy.

The performance takes place inside Museion, while outside the building the media façade will be screening a video by the artist Karim Zeriahen. This piece draws on a group dance experience involving twelve children, once again based on the Schuhplattler.
